City Council Agenda Memo

DATE: May 4, 2016
TO: Mayor & City Council
FROM: Tom Rieman – IT Director
SUBJECT: New Backup Solution

Background:

Our current backup solution can no longer handle the daily needs for our backup data needs. The current backup hardware is over 8 years old. Backup times go over 24 hours and our data capacity continues to grow. Newer technology will compress the data, shorten our backup windows, improve our network bandwidth, and give the IT Department the opportunity restore data faster when applicable.

This upgraded backup solution is a planned budget item in the IT Department 5 year CIP plan.

Action Requested:

City Council approval is requested to purchase 1 Exagrid Appliance model EX10000E at \$17,015.25 plus one year of support at \$2,552.29, total \$19,567.54 from RKON Technologies.

Recommendation:

Staff recommends approval of purchase 1 of the Exagrid Appliance model EX10000E at \$17,015.25 plus one year of support at \$2,552.29, total \$19,567.54 from RKON Technologies. Technology companies were given specifications of our current backup solution, the amount of our current data size, our current backup policies, and federal and state retention policies. Burwood Group proposed Commvault backup solution, cost \$29,968.58. Dell proposed their DR6300 appliance, cost \$56,744.64. Burwood Group also proposed their Exagrid Appliance solution, same model, cost \$20,703.00.

City Council Agenda Memo

DATE: May 5, 2016

TO: Mayor Kuspa and the City Council

FROM: Richard Rinchich, Director of Public Works

SUBJECT: Agreement between the City of Oak Forest and the Metropolitan Water Reclamation District of Greater Chicago for the Distribution of Free Rain Barrels

BACKGROUND

In 2014, the Metropolitan Water Reclamation District of Greater Chicago (MWRD) entered into a consent decree requiring the creation of a program to provide free rain barrels to residents who live in the MWRD service area. This program included the development of a municipal distribution network through intergovernmental agreements with villages and towns.

Municipalities may participate in this free program via an Intergovernmental Agreement (IGA). Once an IGA is executed, the City of Oak Forest will be able to order rain barrels, connection hardware, and delivery from MWRD's vendor at no cost to the City or our residents. The rain barrel(s), connection hardware and delivery will be provided by MWRD at no cost to the residents of Oak Forest. Distribution is limited to a maximum of four rain barrels per home.

The City's responsibility under this program includes the following:

1. Obtain informed written consent from each resident receiving rain barrels allowing and agreeing to MWRD'S limited access to their property solely for the purpose of delivering the rain barrel(s) (via the rain barrel order form filled out by the resident)
2. Place all rain barrel orders with MWRD's vendor on behalf of our residents
3. Within one year of the date of the intergovernmental agreement, the City of Oak Forest will report to MWRD the number of rain barrels distributed, and cooperate with MWRD in the conducting of a post installation survey.

The attached intergovernmental agreement has been reviewed by the City's legal counsel and insurance company to address areas of potential legal and liability exposure. Staff has worked with legal counsel and the insurance company to address

City Council Agenda Memo

and mitigate areas of concern in order to bring the program forward for adoption by the City Council.

ACTION REQUESTED

City Council approval and execution of the attached intergovernmental agreement from MWRD.

RECOMMENDATION

Staff recommends approving and executing the intergovernmental agreement for participation of the City and its residents in MWRD's Free Rain Barrel Program.

Free Rain Barrel Program

City of Oak Forest

The City of Oak Forest is pleased to partner with the Metropolitan Water Reclamation District of Greater Chicago (MWRD) to provide free rain barrels for our residents within MWRD's service area within Cook County. Rain Barrels are a form of green infrastructure designed to capture and reuse rain water. The largest benefit of rain barrel use is achieved by disconnecting the roof runoff from the stormwater system and installing rain barrels to reuse water. Roofs comprise 41% of the impervious surface in Cook County. Many of these surfaces are directly connected to the public drainage system. Rain barrels can lead to potential reduction in water bills.

The goal of the Metropolitan Water Reclamation District of Greater Chicago and the City of Oak Forest's Rain Barrel Program is to lessen the amount of water from entering the storm water sewer system, reducing basement backups, overland flooding, infiltration and inflow. To qualify for free rain barrels, residents must live in Cook County in a municipality that has signed an Intergovernmental Agreement with the MWRD.

Please fill out and sign the lower half of this form and return to the City of Oak Forest City Hall, 15440 S. Central Avenue, Oak Forest, IL 60452. Once the order form has been processed your barrel or barrels (limit of four) will be ordered and then delivered to your home by the MWRD's vendor. Please allow up to six weeks for delivery. Installation is not included. If you have any questions about the City of Oak Forest Rain Barrel program, please contact Public Works at (708)535-4090. If you have questions for MWRD or need more information visit www.mwrld.org or call MWRD's Public Affairs Office at (312) 751-6633.

ARTICLE 14. SEVERABILITY

If any provision of this Agreement is held to be invalid, illegal, or unenforceable, such invalidity, illegality, or unenforceability will not affect any other provisions of this Agreement, and this Agreement will be construed as if such invalid, illegal, or unenforceable provision has never been contained herein. The remaining provisions will remain in full force and will not be affected by the invalid, illegal, or unenforceable provision or by its severance. In lieu of such illegal, invalid, or unenforceable provision, there will be added automatically as part of this Agreement a provision as similar in its terms to such illegal, invalid, or unenforceable provision as may be possible and be legal, valid, and enforceable.

The parties agree that this Agreement may be executed in quadruplicate.

The rights and remedies of the District or the City shall be cumulative, and election by the District or the City of any single remedy shall not constitute a waiver of any other remedy that such party may pursue under this Agreement.

Metropolitan Water Reclamation District of Greater Chicago

Rain Barrel Program

A component of the District's Green Infrastructure Program

I. PROGRAM DESCRIPTION

Rain Barrels are a form of green infrastructure that are designed to capture and reuse rain water. The largest benefit of rain barrel use is achieved by disconnecting the roof runoff from the system and installing rain barrels to reuse water. Roofs comprise 41% of the impervious surface in Cook County. Many of these surfaces are directly connected to the public drainage system.

The goal of the Metropolitan Water Reclamation District of Greater Chicago's (District's) Rain Barrel Program is removing the direct load from entering the sewer system, reducing basement backups, and reducing combined sewer overflow volume, overland flooding, and infiltration and inflow. The District believes the value of keeping water out of the system will benefit the community.

The District's Rain Barrel Program will utilize three distribution networks throughout its service-delivery area to distribute and promote the use of rain barrels. These networks are described in Section II. Each rain barrel distributed will display a specially-designed label that summarizes the environmental benefits of using rain barrels (see Attachment A).

II. DISTRIBUTION NETWORKS

The three networks that will be utilized to distribute rain barrels are: municipalities, community groups/non-governmental organizations and campus- type facilities.

A. Municipalities

Cook County has 129 communities within the District's service area. Each community will be encouraged to adopt the Rain Barrel Program as its own. This program is contingent on funding approval by the Board of Commissioners on an annual basis. Until otherwise indicated, the Program will provide free rain barrels to residents who live in the District's service area.

Municipalities are required to enroll in this free program via an Intergovernmental Agreement (IGA). Once an IGA is signed, municipalities may order rain barrels, connection hardware, and delivery for their residents from the District's vendor at no cost to the municipality. The District will cover the cost of the rain barrels, the connection hardware and home delivery as the District has a contract with a vendor in place; the vendor will furnish and deliver rain barrels, and municipal partners will be

provided with an email address and telephone number that can be used to order the rain barrels for delivery to residents. Distribution will be limited to a maximum of four rain barrels per home.

The District will provide the following templates for municipalities to use:

- **Sample letter and rain barrel reservation form** – The letter and form can be adapted and mailed to residents; the form is designed to collect the information needed to place an order on the resident's behalf.
- **Sample brochure that can incorporate your logo** – Upon request, the District will provide municipalities with a supply of brochures imprinted with their municipal logo.
- **Generic press release** – The language in this generic press release can be used in newsletters, on websites or submitted to local publications.

B. Community Groups/Non-Governmental Organizations

Cook County has many community groups and non-governmental organizations (NGOs) that work to educate residents about stormwater management, green infrastructure and environmental improvement. Community groups and NGOs will have access to the District's rain barrel program. To enroll in this free program, they will be asked to sign a Memorandum of Understanding (MOU). Once the MOU is signed, the community group/NGO may order rain barrels, connection hardware, and delivery for their constituents from the District at no cost to the community group/NGO.

In order to participate, the community group or NGO must:

- Submit a plan to the District describing the utilization of rain barrels;
- Provide detailed ordering information to the District ;
- Periodically ensure proper installation of rain barrels;
- Ensure proper education, care and maintenance of the rain barrels;
- Provide a follow-up report on rain barrel distribution. The report should include the following information:
 - email addresses of constituents receiving the rain barrel(s)
 - street addresses where rain barrels were installed
 - number of rain barrels installed, with a maximum of four rain barrels per home or location
 - a brief report of project successes and/or lessons learned in implementing the project.

C. Campus-Type Facilities

Campus-type facilities include: schools, municipal properties (i.e. town halls, libraries, park district facilities, fire and police stations, garage/outbuilding), churches,

community centers, senior centers, hospitals and clinics. The District will provide free rain barrels to any such facility committed to be a community partner and good steward of stormwater. The facility representative should contact the District regarding execution of a template IGA or MOU and to complete an appropriate application which shall include at a minimum:

- Size of campus
- Number of rain barrels requested
- Percent of downspouts intercepted
- Any other additional stormwater controls implemented on the site

After the rain barrels have been delivered and installed, the facility representative should submit a post-implementation plan or "As-Built" document that provides at minimum:

- addresses and locations where rain barrels were installed
- number of rain barrels installed
- a brief report of project successes and/or lessons learned in implementing the project.

III. MARKETING AND PROMOTION

In addition to providing technical assistance to residents, municipalities, community groups/non-governmental organizations and campus-type facilities on the proper use of rain barrels, a combination of tools will be provided by the District's Office of Public Affairs to promote and market rain barrels to the distribution networks. The tools include the District website, community outreach, public service announcements, email campaigns, press releases, promotion on social media, a rain barrel installation video and distribution of brochures.

Templates for applying for free rain barrels will be provided. In addition, the District can provide materials that utilize logos from the municipalities, community groups/non-governmental organizations and campus-type facilities for program purposes. The District will assign a District liaison to interested municipalities, community groups/non-governmental organizations and campus-type facilities. The liaison can provide assistance and direction during program implementation.

District Commissioners will also play a role in the marketing and promotion of the Rain Barrel Program. Commissioners may use and distribute rain barrels at community events as a means of educating and informing the public about the importance of green infrastructure, promoting the District's Rain Barrel Program, and instructing on proper installation. Upon request of each rain barrel for such events, Commissioners will provide the date, location, and purpose of the event for which the rain barrel(s) is/are being used, acknowledging by signature that the use and distribution is in compliance with the District's Ethics Ordinance policy on political activity.

IV. PROGRAM PERFORMANCE

The District's Maintenance and Operations Department will continue to administer the Rain Barrel Program in cooperation with Engineering and Public Affairs. An assigned resident engineer will administer the rain barrel contract, coordinate deliveries, and document distribution for reporting purposes. The resident engineer will collect the addresses and number of rain barrels delivered and installed. The Office of Public Affairs will document marketing, community outreach and technical assistance and submit this information to the resident engineer for inclusion in an annual report.

V. LABEL

A label will be affixed to every rain barrel distributed (see Attachment A). The label summarizes the environmental benefits of using rain barrels and green infrastructure.

VI. FORMS

Draft forms pertaining to this program are attached and will be modified to include information pertaining to the specific participating municipality, community group/non-governmental organization or campus-type facility:

Installing Your Rain Barrel

Required tools: Hacksaw, tape measure, goggles, gloves, pen or pencil

Recommended materials: 7'-10' garden hose, concrete blocks and/or pressure treated wood

1. Place the Barrel

Rain barrels need to be located near a downspout and on level, pervious (water-absorbing - not paved) ground. Your rain barrel will overflow during heavy rain. Be sure you can direct overflow to pervious ground and away from your (and your neighbor's) home.

Placing your rain barrel on a stable platform will help increase water pressure and make it easier to use a watering can or bucket. Concrete blocks or pressure-treated wood work well for platforms. A full rain barrel weighs approximately 500 pounds, so make sure the platform is sturdy!

If you have a favorite watering can, adjust your platform to make sure it will fit comfortably under the spigot.

2. Measure and Cut

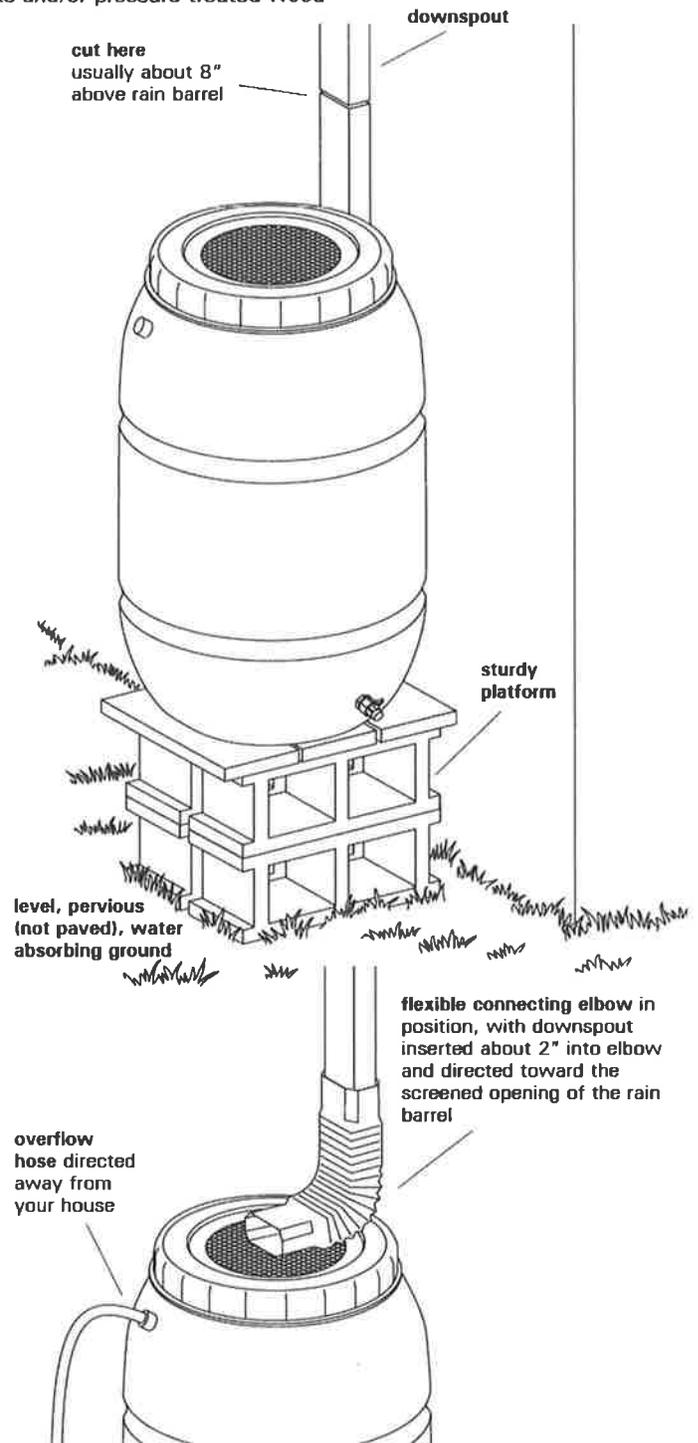

Once your rain barrel is in place, position the flexible elbow (included with your rain barrel) on the barrel and next to the downspout to determine where to cut. The elbow should be aimed at the screened opening on the top of the rain barrel, and the downspout must be inserted about 2" into the elbow. For most installations, it works well to cut the downspout about 8" above the top of the barrel. Keep in mind that the downspout will need to be inserted a couple inches into the connecting elbow. Mark the downspout with a pen or pencil where you will be cutting it.

Once you are sure where to cut, put on your safety goggles and gloves and cut the downspout with a hacksaw.

3. Connect

Connect the flexible elbow to the cut downspout by inserting the downspout into the elbow and positioning it so water will flow into your rain barrel. Connect a garden hose to the overflow fitting and direct it away from your house. Depending on the location of your rain barrel and your yard, this hose may need to be at least 7'-10' long.

Cap off the old downspout location on the ground to prevent it from becoming an animal's nest or clogged with debris.

Disclaimer: With proper installation, maintenance and use, your rain barrel should function properly. The Metropolitan Water Reclamation District of Greater Chicago assumes no liability for the installation, maintenance or use of your rain barrel. We are not responsible for any rain barrel malfunction; property damage or injury associated with your rain barrel malfunction; property damage or injury associated with your rain barrel, its accessories or contents.

Maintaining and Using Your Rain Barrel

You can use rain barrel water to wash your car, water your lawn, or clean work boots and tools. Rain barrel water is naturally free of chlorine, lime, and calcium, and some gardeners swear their plants prefer it.

Rain barrel water is runoff from your roof, so do not drink it or use it for bathing! Disconnect your rain barrel if you need to use a moss killer on your roof. Wait for a few rainy days before reconnecting your rain barrel to allow the moss killer to rinse away. Do not use rain barrel water on plants if your home has a copper roof or gutters.

Oh No, Overflow!

Don't worry, your rain barrel is meant to overflow once it is full. Overflow water will spill from the opening on the top and the overflow fitting. Connect a hose to the overflow fitting to direct the water away from your house. You can also connect a second rain barrel to the first one using the included connecting hose and double the amount of water captured before it overflows.

Check on your rain barrel when it is raining to make sure the overflow is not causing flooding or flowing into your neighbor's property. If your rain barrel is properly installed on a pervious surface, overflow water should be absorbed into the ground. If you see water pooling on your property, consider installing a rain garden, which is a type of landscaping designed to absorb water.

Regular Maintenance

Regularly check your gutters, downspouts, rain barrel water intake screen, rain barrel mosquito screen and rain barrel spigot for leaks, obstructions or debris. Also, confirm that the lid is secure so children and animals cannot fall into the rain barrel.

Winterizing

Drain your rain barrel before temperatures drop below freezing and keep the spigot open in the winter so water does not accumulate and freeze.

You can also turn it upside down or bring it inside to ensure no water accumulates in the barrel.

Preventing Mosquitoes

Your rain barrel comes with a mosquito-proof screen under the lid. When the mosquito netting is intact, and there are no leaks where mosquitoes can enter the barrel, your rain barrel should be mosquito-free.

Remove accumulated water from the top of the barrel every 3-4 days during the rainy season. Mosquitoes need at least 4 days of standing water to develop larvae.

If you believe mosquitoes may be breeding in your rain barrel, empty it completely and let it dry out to kill all mosquitoes.

If you want to customize the appearance of your rain barrel, you can

Paint Your Rain Barrel

Follow these steps to paint your rain barrel:

1. Wash it thoroughly with soapy water to remove any dust or dirt.
2. Once the barrel is dry, apply a plastic primer designed to adhere to polyethylene plastic. Follow the instructions for the primer, including safety precautions.

Note: Don't skip this step. Primer is important! Paint will not stick to a rain barrel without primer, and house paint primers will not adhere well to rain barrel plastic.

3. Gently buff the primer surface with fine sandpaper to remove any glossy areas.
4. Paint the barrel with artist's acrylic paint. Acrylic paint is durable and won't chip or crack as easily as other paints.
5. Allow several days for the paint to dry completely and apply a clear spray sealant to protect your artwork. Follow the instructions for the spray sealant, including safety precautions. This will protect your work of art from the elements.
